

ONE

TACTICAL PROTECTION SERVICES

COMPANY PROFILE · 2026

The work of protection. *From the field.*

A South African tactical security company based in Johannesburg and the Cape Winelands, with teams deployed across the country. We protect wine estates, large rural land, residential and private estates, and VIP clients, and we hold the line when riots and strikes put people and property at risk. Every mobile Tactical Response Unit carries a tactical unit, a drone pilot, and a man-trailing K9.

NATIONWIDE

Standard security isn't good enough for what you have to protect.

In South Africa, security isn't a luxury. For high-net-worth individuals, luxury residential estates, wine estate owners, commercial farmers, blue-chip corporations, and VIPs, the threats are real, evolving, and often underestimated. We deliver tactical protection built on military-grade methodology: tactical response teams, high-risk deployment units, aerial drone surveillance, and elite K9 units, coordinated in real time by our Tactical Operations Center.

This isn't a guard at a gate. It's a security ecosystem designed around your property, your risk profile, and your peace of mind.

READINESS Armed, trained officers and vehicles ready to respond around the clock.

PREVENTION Risk assessments, visible patrols, and intelligence that stop incidents before they escalate.

RESTRAINT Force that is lawful, necessary, and proportionate, with the preservation of life first.

ACCOUNTABILITY Written incident reports, time-stamped logs, and regular service reviews with every client.

Seven environments. One standard.

01 · WINE ESTATES

Wine Estates

Protection for estates that are farms, tourist destinations, and event venues at once: guests, cellars, staff, and wide vineyard boundaries.

Tactical Response · Armed Guarding · K9 · Drone Surveillance · Event security

02 · RURAL LAND

Large Rural Land

Farms, game land, and large holdings where boundaries run for kilometres. Aerial overwatch, K9 patrols, and teams that can cover ground fast. Our OSG Intel platform tracks the reconnaissance that comes before a farm attack.

Drone Surveillance · K9 · Tactical Response Teams · Electric Fencing

03 · UNREST

Riots and Strikes

When unrest or industrial action threatens a site, we deploy trained teams to protect people, keep access points secure, and keep operations running where it is safe to do so.

Tactical Response Teams · K9 · Drone overwatch · Risk planning

04 · VIP

VIP Clients

Discreet close protection for principals, executives, and their families, at home, on location, and when they travel between cities.

Close Protection · Protected vehicles · Advance planning

05 · RESIDENTIAL

Residential Estates

Layered protection for estates and their residents: controlled access, monitored perimeters, and armed response that arrives fast.

Security Guarding · Off-Site Monitoring · Tactical Response · Guarding

06 · PRIVATE

Private Estates

Dedicated protection for a single family and property, built around how they live, with officers and vehicles assigned only to them.

Tactical Response Teams · Close Protection · K9 · Drone Surveillance · Electric Fencing

07 · CORPORATE

Blue-chip Companies

Protection for corporate head offices, distribution centres, plants and executive teams, delivered to the reporting, compliance and confidentiality standards large companies expect. One provider for guarding, tactical response, monitoring and executive protection, with a single point of accountability.

Armed Guarding · Tactical Unit Deployment · Off-Site Monitoring · Security Guarding · Close Protection

Your family. Fully protected.

First-class protection for principals, high-net-worth families and family offices. From CCTV to the officer at your side, every layer is planned, run and answered for by ONE. One team. One point of contact. Complete discretion.

PRINCIPAL PROTECTION

Close Protection Officers with you at home, at work and wherever you go, planned from a confidential threat assessment.

FAMILY PROTECTION

Your spouse, children and parents: school runs, activities, events and holidays, kept low-key so nobody is singled out.

ARMED TACTICAL SECURITY ON THE GROUND

Armed tactical officers on site at your home or estate, day and night, with multipurpose K9s available as an option.

DISCRETION FIRST

Non-disclosure agreements, need-to-know itineraries and officers who blend in. We never discuss clients publicly.

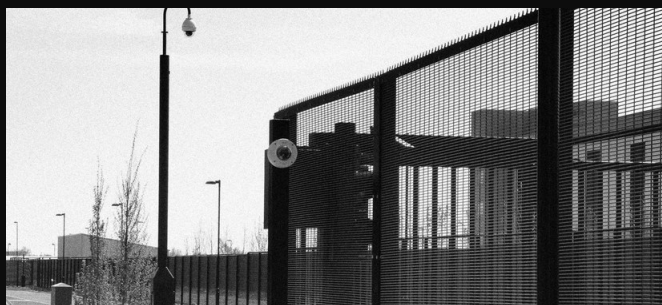

ONE COMPANY. EVERY LAYER.

01 CCTV & ALARMS Cameras, alarms, panic buttons and perimeter detection designed for your home and installed by our own technicians.	02 24/7 MONITORING Your cameras and alarms watched live by operators in our Tactical Operations Center.	03 TACTICAL RESPONSE Armed tactical units, with drone and K9 support, dispatched to every alarm and panic activation.	04 ARMED ON-SITE DEPLOYMENT Armed officers and Team Leaders stationed at your home or estate, day and night.	05 CLOSE & FAMILY PROTECTION Close Protection Officers with you and your family at home, at school, at work and abroad.
---	--	--	---	--

PRIVATE CLIENTS ON THE WEBSITE →

One company. Every layer of protection.

Each division runs under the same command structure and reports into the same Tactical Operations Center, so a client with three services deals with one team.

ACI · DIV 01

Alarm, Camera and Fence Installations

Alarms, CCTV, panic buttons and electric fencing installed by our own technicians and connected straight to our TOC.

ACS · DIV 02

Security Guarding

Uniformed officers for gatehouses, access points and patrols, reporting to our TOC every shift.

OSM · DIV 03

Off-Site Monitoring

24/7 live monitoring of your cameras from our Tactical Operations Center, with immediate dispatch when something is wrong.

UAV · DIV 04

Drone Surveillance

Our own drones and licensed pilots: thermal overwatch with a live feed to the TOC.

ATD · DIV 05

Armed Tactical Guarding

Armed tactical officers on site, led on every shift by armed Team Leaders, with multipurpose K9s available.

K9 · DIV 06

K9 Deployment

Certified dogs and armed handlers for patrol and protection, tracking and man trailing.

From the gate to the principal.

TRU · DIV 07

Tactical Response

24-hour armed response to alarm, panic and duress activations, with a tactical unit, drone pilot and man-trailing K9 on every unit.

TRT · DIV 08

Tactical Response Teams

A dedicated tactical unit and vehicle assigned to one client, patrolling and responding on site.

TUD · DIV 09

Riots and Strikes

Tactical units trained and equipped for riots, strike action and unrest, protecting your people, gates and critical assets when the situation turns.

JM · DIV 10

Journey Management

Every trip planned and protected, in South Africa and abroad: advance work, airport to door, and a Close Protection Officer with you throughout.

PCL · DIV 11

Private Clients

Close protection and family protection for high-net-worth families, with the full security complement at home.

CPO · DIV 12

Close Protection

Discreet protection for principals and families, at home and on the move, with journey management.

One command structure. Every division reports to the same 24/7 Tactical Operations Center, so a client with several services deals with one team.

Every mobile unit carries a tactical unit, a drone pilot and a man-trailing K9.

24-hour armed response to alarm, panic, and duress activations. Every mobile Tactical Response Unit carries a tactical unit, a drone pilot, and a tactical man-trailing K9, so we can act immediately on arrival.

24/7 receipt of alarm, panic, and duress activations

Immediate dispatch of the nearest Tactical Response Unit

Every mobile unit: tactical unit, drone pilot, and tactical man-trailing K9

Thermal drone overwatch launched on arrival

HOW IT WORKS

1. An alarm or panic signal reaches the Tactical Operations Center.
2. A unit is dispatched at once while the TOC calls you or your key holder.
3. On arrival the drone launches, the K9 sweeps the site, and the team secures the scene.
4. You receive the outcome immediately and a written report within 24 hours.

[TACTICAL RESPONSE ON THE WEBSITE →](#)

One room. Every site. Nothing missed.

Our Tactical Operations Center runs every deployment, 24 hours a day. Cameras, alarms, drones, patrols and our response vehicles all report into one room, and Paveer AI brings them together on a single platform, so every event is seen, checked and acted on.

EVENTS TODAY

100%

REVIEWED BY AI

24/7

STAFFED

01

Detect

Every camera, alarm, fence sensor, drone and vehicle tracker feeds one platform. Paveer AI watches all of it at once and flags people, vehicles and unusual movement.

02

Verify

An operator checks every alert on camera or by drone, and confirms with the client's safe word, so real threats are acted on and false alarms are cleared fast.

03

Dispatch

The nearest Tactical Response Unit is sent with a tactical unit, drone pilot and K9, and the team sees what the operator sees on the way in.

04

Overwatch

The TOC stays on the incident: drone overwatch, live camera feeds, contact with SAPS and the client until the scene is secure.

05

Report

Every alert, call, dispatch and arrival is time-stamped and logged to OSG Intel, and the client receives a written report within 24 hours.

WHAT MAKES OUR TOC DIFFERENT

ONE AI PLATFORM

Paveer AI brings every camera, alarm, drone and vehicle into one screen, instead of operators switching between systems.

LINKED TO INTELLIGENCE

Faces, vehicles and incidents are checked against OSG Intel, so a returning suspect is recognised.

NEVER FATIGUED

The AI watches every feed every second of the night. Operators are freed to judge and act, not to stare at screens.

OUR OWN RESPONSE

The TOC dispatches our own Tactical Response Units, K9 and drones.

Every journey. Planned and protected.

For principals, executives and families travelling in South Africa or abroad. Our Close Protection Officers plan every movement, go ahead to check the ground, and stay with you from the moment you land until you are home, backed 24/7 by our Tactical Operations Center.

01

Threat assessment and planning

Current threats, entry requirements, hotels, routes and timings for every leg, planned and agreed with you before you travel.

02

Advance work

Your Close Protection Officer arrives ahead of you to check meeting venues, primary and alternate routes, safe havens and the nearest private hospitals.

03

Airport to door

Met at arrivals and moved in a vetted, discreet vehicle on a route agreed in advance, with no waiting around in public.

04

Protection on the ground

Your officer stays with you whenever you leave the hotel, medically trained and in contact with our Tactical Operations Center around the clock.

05

Home safe

Escorted back to departure, followed by a debrief and a written report.

Our teams travel with clients across South Africa and abroad, including Nigeria, Kenya, Ghana, the DRC, Angola, Mozambique, Tanzania, Uganda, Ethiopia, Zimbabwe, Zambia, Namibia, Botswana, Egypt, Morocco, Somalia, Mauritius and the UAE. Every trip is planned, protected and tracked 24/7 by our Tactical Operations Center.

Two bases. Teams across the country.

JHB · BASE 01 JOHANNESBURG Our Gauteng base, serving corporate, residential, and private clients across the city and the province.	CWL · BASE 02 CAPE WINELANDS Our Western Cape base in Simondium, protecting wine estates, hotels, and residential estates across the Winelands and the Cape.	NAT · DEPLOYED NATIONWIDE Teams deployed around the country for ongoing contracts, events, productions, and high-risk operations.
--	--	---

JOURNEY MANAGEMENT · CLOSE PROTECTION

Your detail travels with you, in South Africa and abroad.

Every journey is planned stage by stage: route recce and risk check, collection at the door, the road or the flight, arrival, every movement on the ground, and the handover back home. Our Close Protection Officers report to the 24/7 Tactical Operations Center, with Tactical Response Units on call in Gauteng and the Cape Winelands.

PLAN A JOURNEY ON THE WEBSITE →

Registered, accountable, and our own people.

— 01 Site assessment We visit the property, walk the boundary and talk through the risks, the people on site and what has happened before.	— 02 Plan and quotation A written security plan sets out the officers, K9s, vehicles and technology the site needs, with a clear quotation.
— 03 Deployment Our own teams deploy under one command structure, linked to the Tactical Operations Center from the first shift.	— 04 Reporting and review Every incident is reported in writing within 24 hours. Every quarter we reassess the site and issue a risk assessment and incident report.
